

NEVADA COPPER

BUILDING A NEW U.S. COPPER DISTRICT

FEBRUARY 2022

Cautionary Language

This presentation contains “forward-looking information” and “forward-looking statements”, within the meaning of applicable Canadian securities laws, concerning Nevada Copper Corp. (the “Company”) and its plans for its properties and other matters. Such forward-looking information and forward-looking statements specifically include, but are not limited to, statements and information with respect to: the Company’s plans for the Pumpkin Hollow project (the “Project”); the Company’s mine development, production and ramp-up plans and the expected timing, costs and results thereof; mining rates; the completion of the ramp-up of the underground mine at the Project (the “Underground Mine”) and plans in respect thereof; exploration activities.

Forward-looking statements and information include statements regarding the expectations and beliefs of management. Often, but not always, forward-looking statements and forward-looking information can be identified by the use of words such as “plans”, “expects”, “potential”, “is expected”, “anticipated”, “is targeted”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates”, or “believes” or the negatives thereof or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements or information should not be read as guarantees of future performance and results. They are subject to known and unknown risks, uncertainties and other factors which may cause the actual results and events to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Such risks and uncertainties include, without limitation, those relating to: the ability of the Company to complete the ramp-up of the Underground Mine within the expected cost estimates and timeframe; requirements for additional capital and no assurance can be given regarding the availability thereof; the impact of the COVID-19 pandemic on the business and operations of the Company; the state of financial markets; history of losses; dilution; adverse events relating to milling operations, construction, development and ramp-up, including the ability of the Company to address underground development and process plant issues; ground conditions; cost overruns relating to development, construction and ramp-up of the Underground Mine; loss of material properties; interest rate increases; global economy; limited history of production; future metals price fluctuations; speculative nature of exploration activities; periodic interruptions to exploration, development and mining activities; environmental hazards and liability; industrial accidents; failure of processing and mining equipment to perform as expected; labour disputes; supply problems; uncertainty of production and cost estimates; the interpretation of drill results and the estimation of mineral resources and reserves; changes in project parameters as plans continue to be refined; possible variations in ore reserves, grade of mineralization or recovery rates from management’s expectations and the difference may be material; legal and regulatory proceedings and community actions; accidents; title matters; regulatory approvals and restrictions; increased costs and physical risks relating to climate change, including extreme weather events, and new or revised regulations relating to climate change; permitting and licensing; volatility of the market price of the Company’s securities; insurance; competition; hedging activities; currency fluctuations; loss of key employees; and other risks of the mining industry. The forward-looking statements and information contained in this presentation are based upon assumptions management believes to be reasonable, including, without limitation: no adverse development in respect of the property at the Project; no material changes to applicable laws; the ramp-up of operations at the Underground Mine in accordance with management’s plans and expectations; no worsening of the current COVID-19 related work restrictions; reduced impacts of the COVID-19 pandemic in the medium-term and long-term; no material adverse change to the price of copper from current levels; and the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. The forward-looking information and statements are stated as of the date of this presentation (or as otherwise indicated). The Company disclaims any intent or obligation to update forward-looking statements or information except as required by law. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that could cause actions, events or results not to be as anticipated, estimated or intended. Specific reference is made to “Risk Factors” in the Company’s Annual Information Form dated March 18, 2021 and the risks discussed in the Company’s Management’s Discussion and Analysis in respect of the year ended December 31, 2020. Should one or more of these risks or uncertainties materialize, should other risks or uncertainties materialize or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements and information. For more information on the Company and the risks and challenges of its business, investors should review the Company’s filings that are available at www.sedar.com. The Company provides no assurance that forward-looking statements and information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements or information. Accordingly, readers should not place undue reliance on forward-looking statements or information. This presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities in any jurisdiction to any person.

The technical information and data in this presentation was reviewed by Greg French, C.P.G., VP Head of Exploration of Nevada Copper, a consultant to Nevada Copper, who is a non-independent Qualified Person within the meaning of NI 43-101.

Note: All dollar amounts are in US dollars unless otherwise denoted.

The Nevada Copper Story

Nevada Copper (“NCU”) owns two copper assets on a single property, Pumpkin Hollow, in the USA - an underground mine that is ramping up and a large-scale, fully-permitted open pit with a completed PFS

Production Ramping up: Underground mine operating and forecast to ramp up to steady state production in H2 2022

Strong Growth Pipeline: Development progressing on significantly larger open pit mine; embedded expansion opportunities on both projects; further defined targets in same district

Safe Jurisdiction: NCU controls the only copper project of scale that is ready to build in North America; global copper supply growth largely in challenging jurisdictions

Green Copper Production: Both projects utilize dry filtered tailings with efficient waste / water management; Decarbonization program underway for open pit project targeting fleet electrification and solar power

2022 Strategic Plan

Accelerating Underground Mine Ramp-up

- Primary focus is to ramp up operations to steady state at the underground mine by H2
- Annual run-rate copper production in PFS 30,000t; key infrastructure in place to enable potential expansion to 40,000t

Progress Open Pit Project

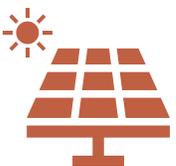

- PFS being updated in Q2: larger resource, increased scale, incorporate solar plant and other work completed since 2018, update for input costs and copper market outlook
- Definitive Feasibility Study is expected to follow

Next Phase of Drill Program

- Drill program expected to recommence in Q2
- Objectives are to further define open pit, convert inferred resources, and follow up on most prospective targets: Tedeboy Porphyry and Black Mountain

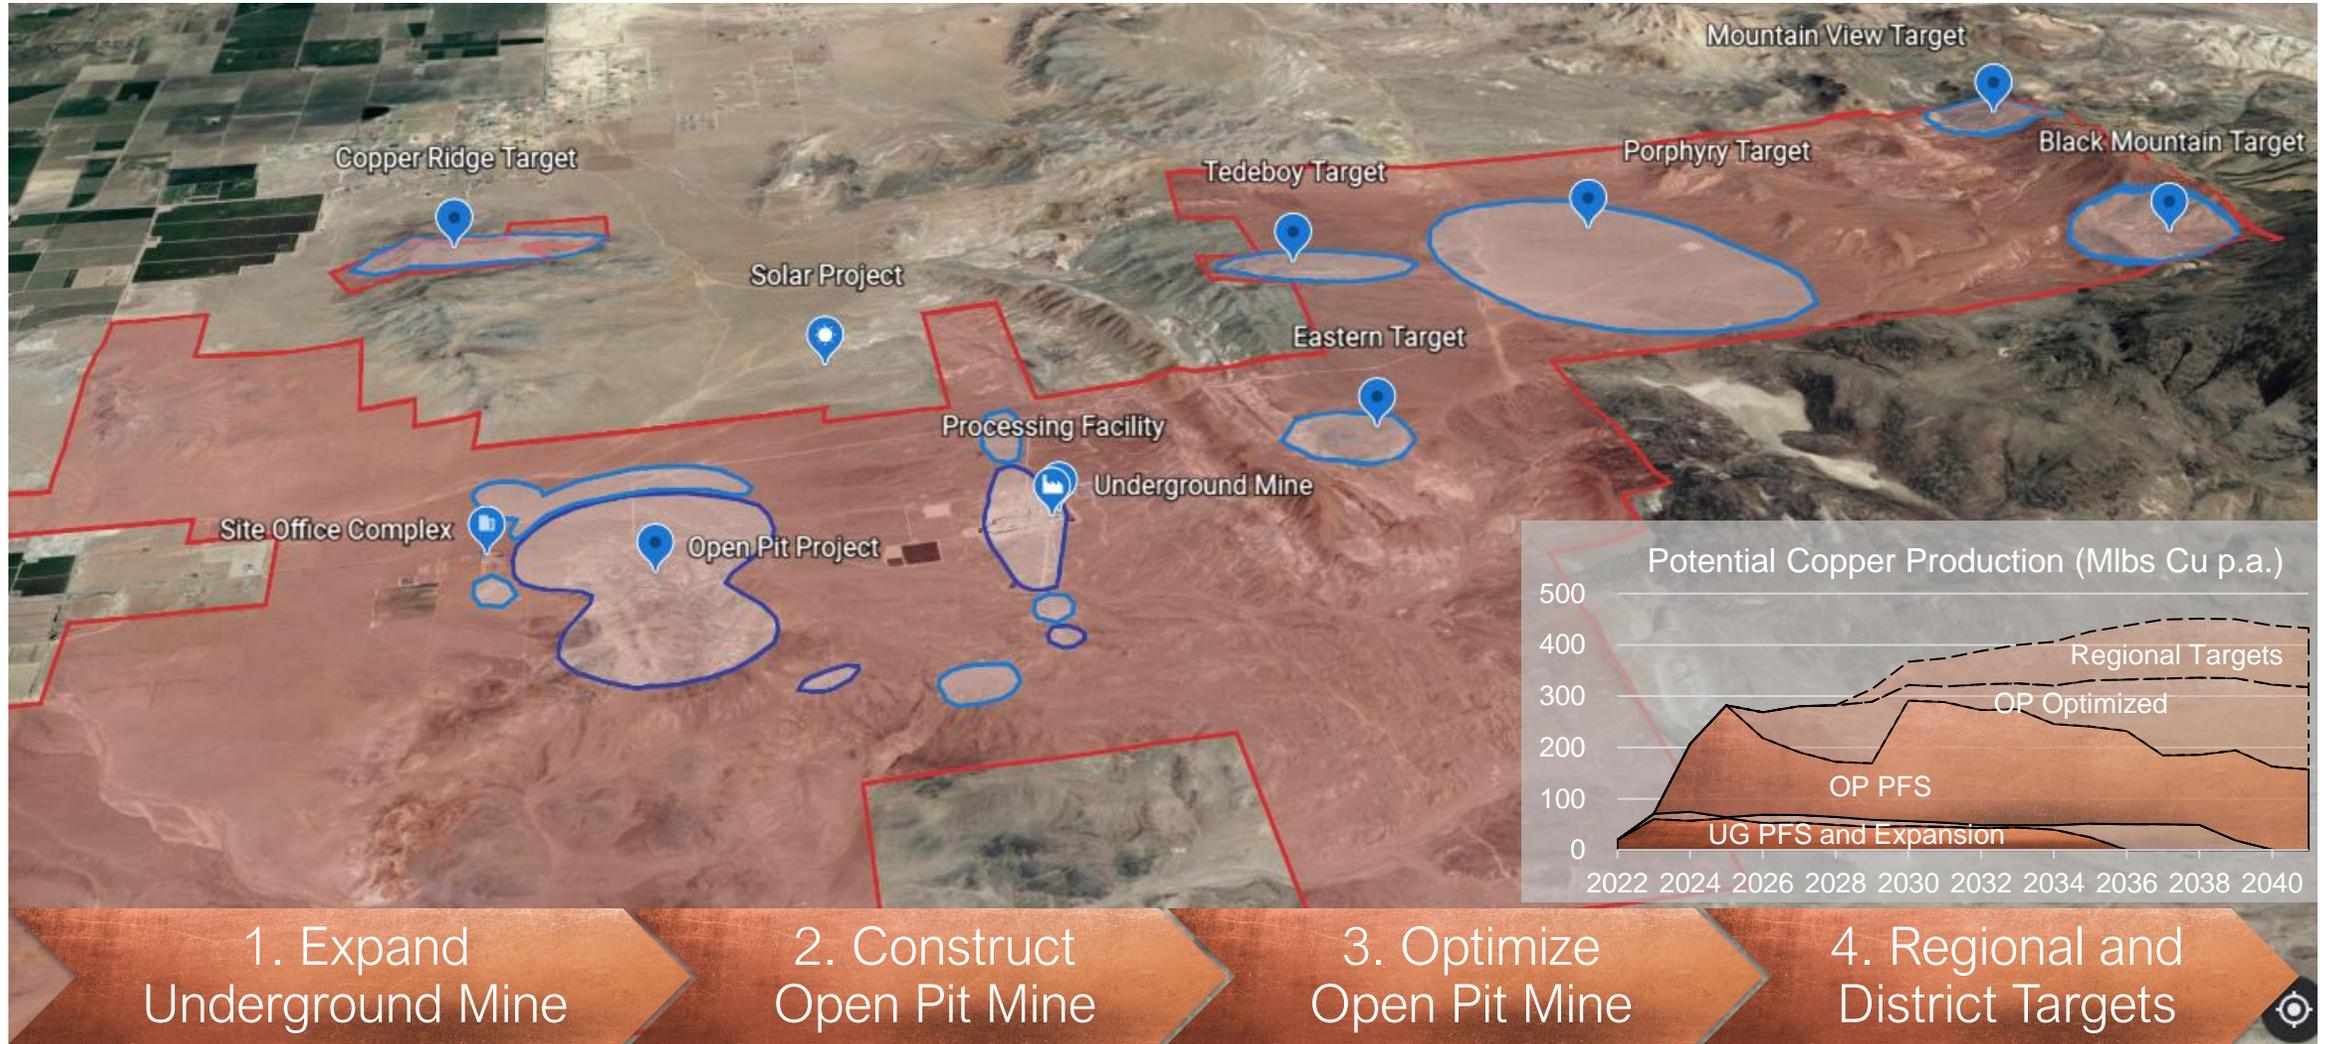

Decarbonization and Sustainability

- Complete Open Pit Decarbonization Study to incorporate fleet electrification and solar power into the DFS
- First Sustainability Report to be compiled based on 2022 performance

Long-Term Strategy

Build a new copper district through staged expansion options^{1,2}

Corporate Snapshot

H2 2021 Highlights:

- C\$125m financing completed to provide funding for underground ramp-up, open pit advancement, and drill program
- Balance sheet strengthened: Debt reduced by 30% and senior loan repayment profile deferred significantly
- Two strategic mining investors added to shareholder base: Mercuria and Solway

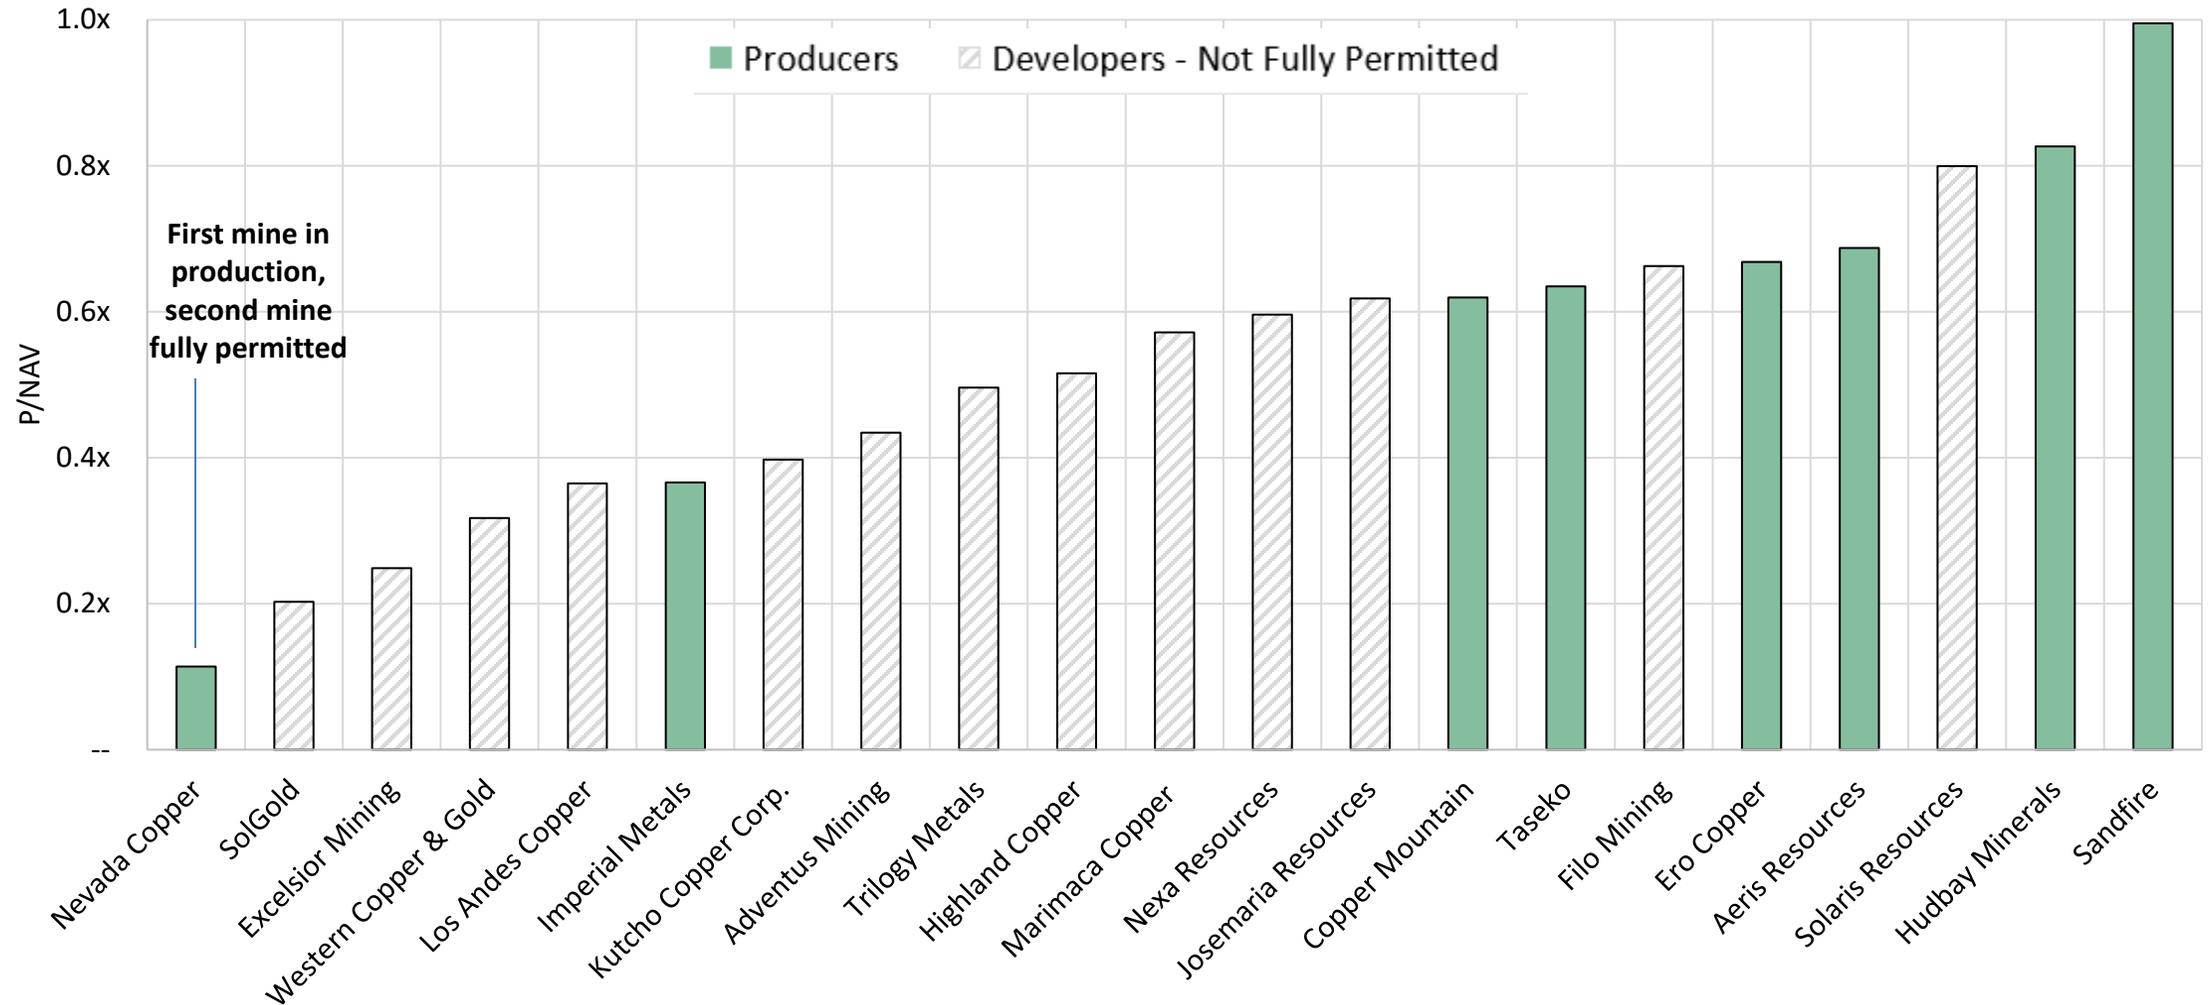

Capital Structure	
Ticker	TSX:NCU
Share Price (14 February '22)	C\$ 0.70
Market Capitalization	C\$ 312M
Cash & Cash Equivalents ¹	US\$ 68M
Senior Debt ¹	US\$ 169M
Shares Outstanding	446M
30-Day Average Traded Volume	1.8M

Shareholders	
Pala Investments	37.6%
Solway	10.9%
Mercuria	10.9%
BlackRock	1.8%
Hargreave Hale	1.1%
Management	0.5%
Other	36.7%

Benchmarking: Comparative Analysis

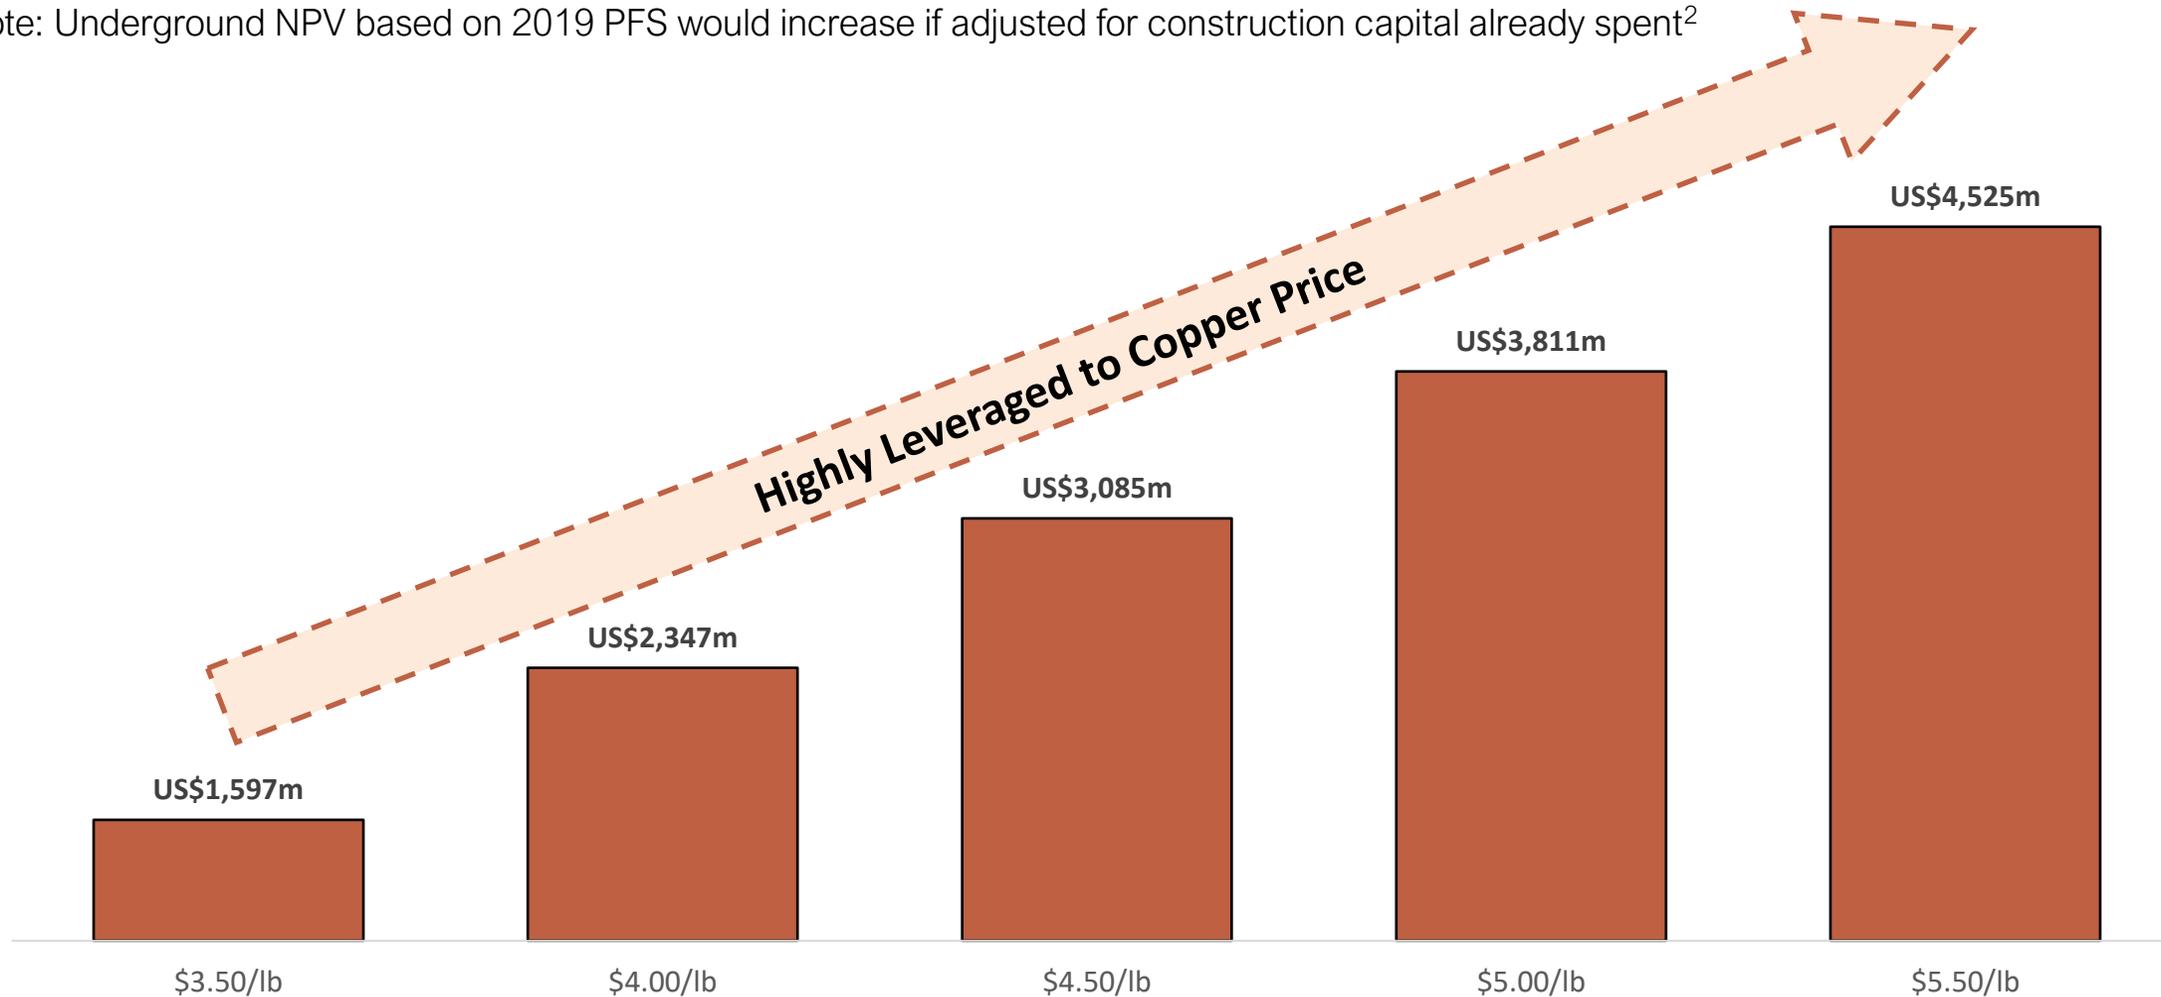

P/NAV Benchmarked to Copper Companies in North & South America¹

Exceptional Value Opportunity and Leverage to Cu Price

Combined UG and OP NPV^{7.5} Sensitivity to Copper Price¹

Note: Underground NPV based on 2019 PFS would increase if adjusted for construction capital already spent²

Copper Market: Scarcity of ready-projects in favorable jurisdictions

Significant demand for copper to build a cleaner world

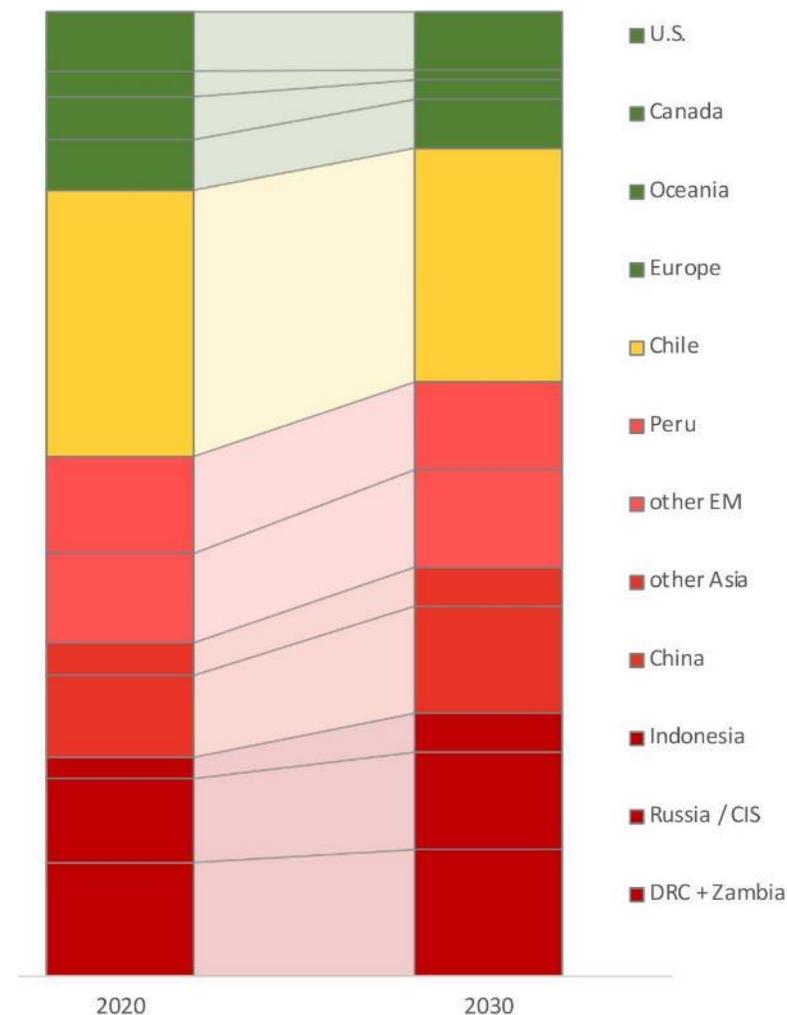

- Increasing demand for copper without ethical, environmental externalities
- Focus on shortening of supply chains to reduce costs and carbon footprint

Supply growth pipeline in riskier projects and jurisdictions

- Global copper output estimated to peak in 2023
- Remaining growth limited to high-risk projects (block caves), challenging jurisdictions (Mongolia, Africa), or regions with social unrest (Chile, Peru)
- Time from new discovery to production takes >15 years on average²

Pumpkin Hollow is the only copper project of scale ready to build in North America

Copper supply is risky, and is getting riskier¹

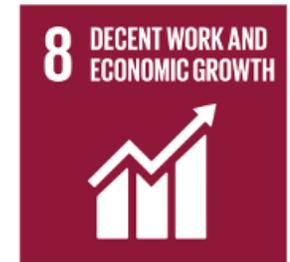

Producing Green Copper

An essential metal for the energy transition

Sustainable Strategy

- Strategy aligns with UN Sustainable Development Goals for:
 - 7) Affordable and clean energy
 - 8) Decent work and economic growth
 - 11) Sustainable cities and communities
 - 12) Responsible consumption and production
- Sustainability Committee to be formed in H1 2022

Sustainable Operations

- Best in class waste and water management, with both mines utilizing dry filtered tailings, removing the need for tailings dams
- Low carbon footprint of grid power used in Nevada
- Short supply chain with domestic and Pacific basin export
- Decarbonization Program to incorporate electric fleet and solar power option into open pit project

Senior Management Team

Management team highly experienced in mine construction, start-up and business optimization in both majors and juniors

Randy Buffington

Chief Executive Officer

Randy has extensive experience in underground and open pit mining operations, both in Nevada and internationally. Most recently at Hycroft Mining, he was responsible for the operational reforms, successfully executing a project turnaround delivering significant shareholder value as President and CEO. Previously, he held senior management positions with Barrick, Placer Dome and Cominco.

André van Niekerk

Chief Financial Officer

André was previously the CFO of Golden Star Resources where he oversaw the establishment of multiple new mining operations, as well as an overhaul of the company's ERP, management reporting and control systems. He also has extensive capital markets experience and previously held senior positions at KPMG.

Cassandra Joseph

General Counsel

Cassandra has more than 20 years of legal experience with a focus on mining and metals, environmental and corporate law. Prior to joining Nevada Copper, she served as VP Associate General Counsel, Corporate Secretary and Chief Compliance Officer for Nevada-based Tahoe Resources Inc.

Greg French

VP Exploration and Project Development

Greg is a geologist with over 35 years of exploration experience in the western US and Canada, including for Homestake Mining Co., Atlas Precious Metals, and Cornerstone Industrial Minerals. He is credited with a Nevada gold discovery and has extensive experience in overseeing projects developed into successful operations.

Steve Newman

VP Technical Services

Steve is a mining engineer with over 30 years of experience in underground and open pit mining operations, including extensive feasibility study work. Mr. Newman has successfully delivered multiple project scoping, prefeasibility, and feasibility studies for both underground and open pit projects, including for Hycroft Mining and Barrick.

Tori Martinez

VP Human Resources

Tori has over 20 years in the Human Resources field. She has experience in various facets of Human Resources including employee relations, compensation and benefits, project management, employee engagement, HR policy, immigration management, and performance management. Tori previously served in senior HR positions for Fiore Gold and Hycroft Mining and served in the military.

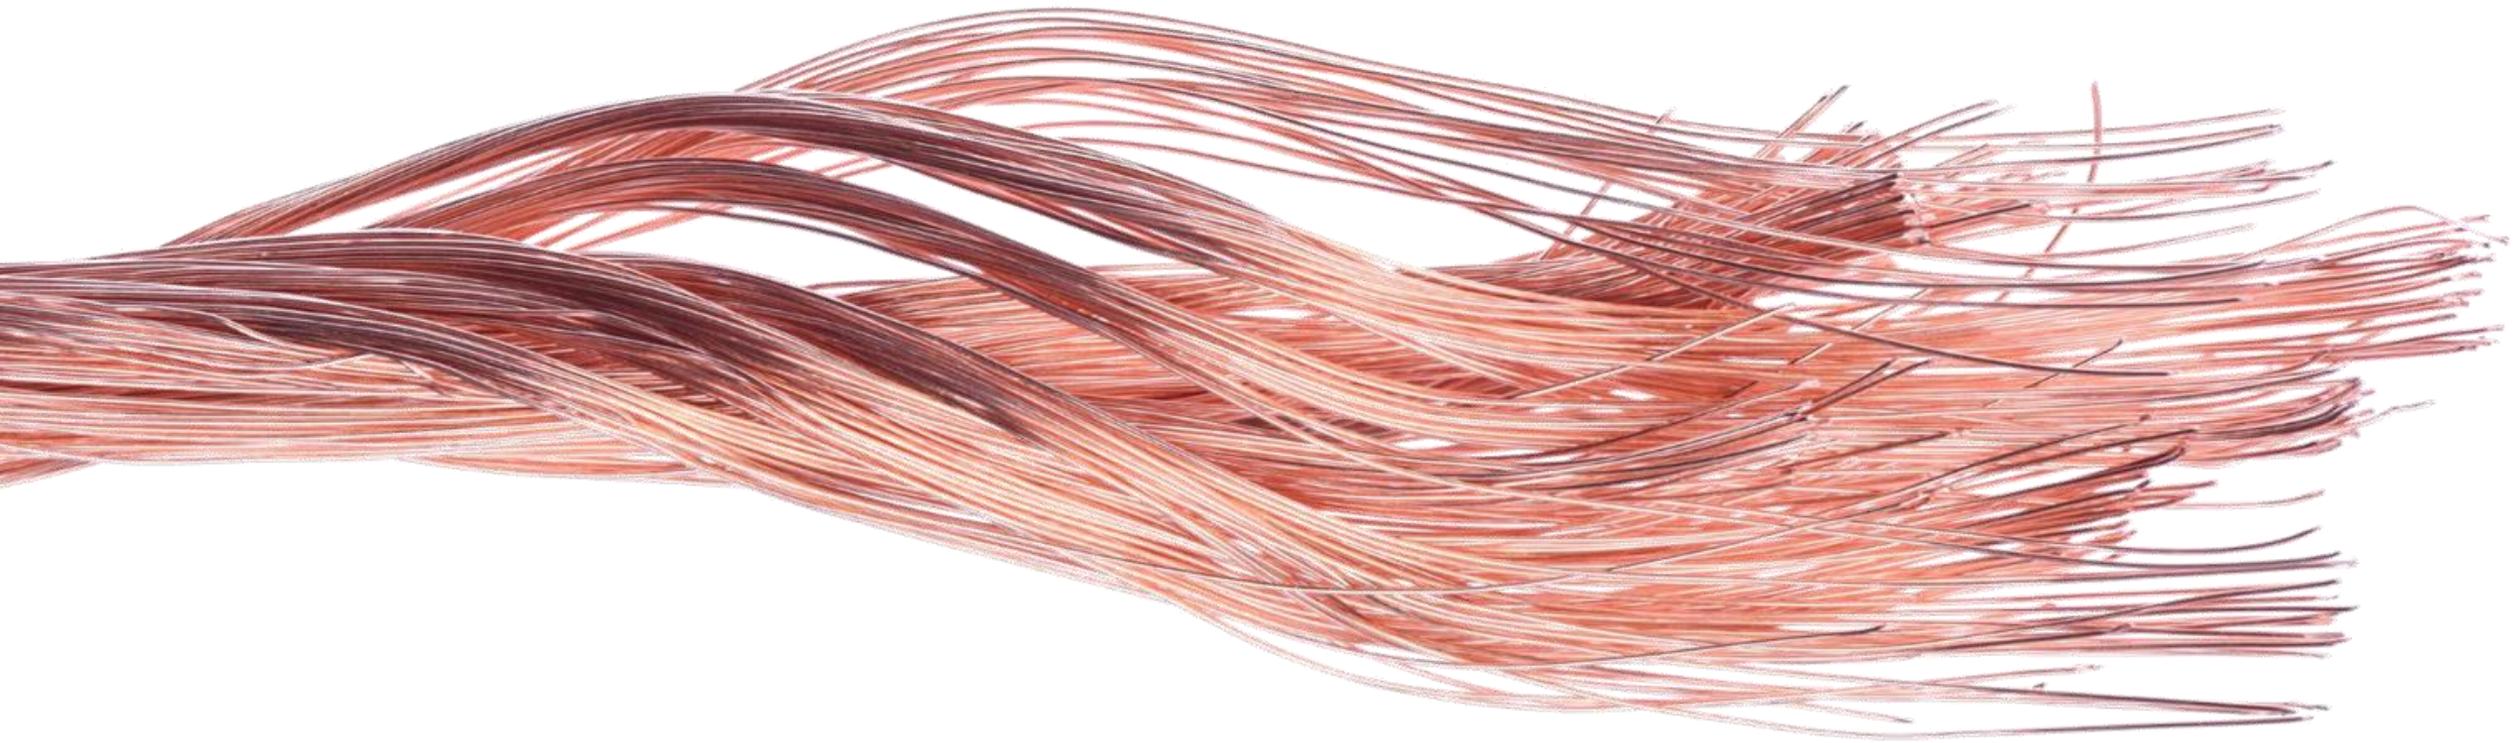

Nick Atiemo

Environmental Manager

Nick has over 14 years experience in the mining industry as an Environmental Professional. He has spent most of his mining career with Placer Dome, Barrick, and Nevada Gold Mines. During his time with Barrick, he served in various roles including Senior Environmental Engineer, Environmental Superintendent, and Environmental Manager for Cortez Mine.

Appendices

Appendix A: Operations and Strategic Position

Exceptional Production Growth Profile

- One operation already in production, with expansion defined
- Second mine permitted, with multiple expansion phases
- Current reserves of 4.4Bn lbs Cu eq^{1,2}
- Large 24,000-acre land holding in rare US copper district

Significant Exploration Upside

- Additional 2.6Bn lbs Cu eq^{1,2} of resources
- Multiple additional targets already defined on Nevada Copper property

Strategic Advantage in Re-emerging District

- Key position in district with significant copper resources
- Power infrastructure in-place and water rights secured
- Dry-stack tailings permitted, with large area for storage expansion
- 2015 Nevada Copper land bill has yet to be replicated by any other project in US

(1) Source: Resource Statements (see Appendix), effective date January 21, 2019

(2) Metals prices used for equivalent calculations: US\$1,800/oz Au, US\$25/oz Ag, US\$6,600/t Cu. Recoveries used for UG resources/reserves as per 2019 PFS Technical Report: 92% Cu, 78% Au, 70% Ag. Recoveries used for OP resources/reserves as per 2019 PFS Technical Report: 90% Cu, 67.3% Au, 56.3% Ag

Appendix A: Organic Growth 1. Underground Expansion Options

Significant inferred resource upside and latent installed capacity creates attractive options expansion

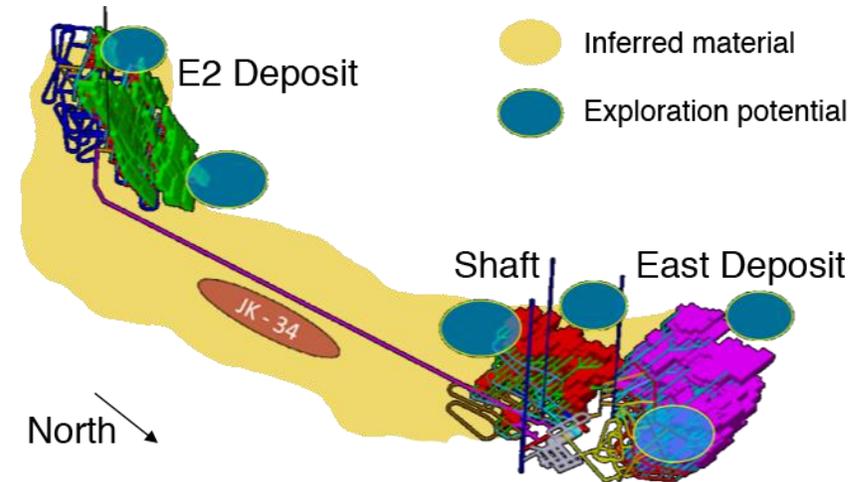

Excess Installed Capacity

- Major infrastructure was constructed with excess installed capacity
- Potential for significant production expansion with only minor modifications
- Construction of E2 surface decline would also improve the independence of the 3 mining areas

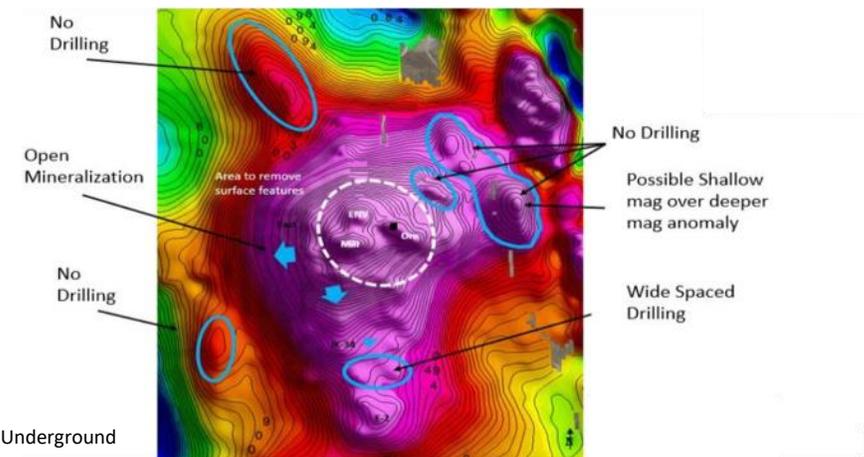

Significant Resource Upside

- Significant underground Inferred Resources provide opportunity to extend mine life through infill drilling
- Multiple resource extension targets around mining zones, plus potentially large new target to east of headframe identified through recent geophysical survey
- Converting inferred resource and expanding throughput could significantly further increase project economics^{1,2}

Additional 636 million lbs of inferred resource outside of UG mine plan

Recent geophysical survey identifies further UG extensions

Appendix A: Organic Growth 2. Open Pit Project – Robust Economics & Scale

>5 billion pounds of copper resource¹

Fully permitted: only permitted copper project in North America

Exceptional ESG metrics (dry tailings, water management, solar option)

High copper grades: 0.69% Cu eq first 5yrs¹

Lowest capital intensity of peer group

US\$239m annual EBITDA at \$3.20/lb copper^{1,2}

Expandable scale: start-up at 37Ktpd, option to accelerate 70Ktpd expansion, reviewing beyond >80Ktpd

(1) Technical Report, entitled “NI 43-101 Technical Report: Nevada Copper Corp. Pumpkin Hollow Project, Open Pit and Underground Mine Prefeasibility Study (PFS)”, with an effective date of January 21st, 2019.
(2) EBITDA and AISC are Non-IFRS measures. For more information please see “NI 43-101 Technical Report: Nevada Copper Corp. Pumpkin Hollow Project, Open Pit and Underground Mine Prefeasibility Study (PFS)”

Organic Growth: 3. Open Pit Optimization

2019 PFS Optimized for Upfront Capex¹

- Designed to minimize upfront capital and maximize IRR at low copper prices
 - 37ktpd start-up, expanding to 70ktpd in year 6
 - Pit designed using Cu price of \$2.48/lb
 - High >45% margins at \$3.20/lb LT Cu price

Expansion Options

- The Open Pit phase 2 expansion is highly flexible, allowing for Phase 2 to be accelerated or deferred
- Accelerating expansion to 70ktpd could significantly further increase project economics²
 - Increase initial copper production by over 25ktpa
 - Increase EBITDA by 40%

Decarbonization Program Advanced

- Potential for up to 200MW solar project, to provide power for the Open Pit and reduce operating costs
- Ability to move to electric mining fleet, providing further cost reductions

Compelling economics: PFS² designed to maximize IRR at low prices

Long Life of Mine	19 years – 386Mt @ 0.50%Cu
Value optimized head grade profile	0.69%CuEq first 5yrs
Low upfront capital cost	\$672M
Competitive C1 and AISC³	\$1.73/lb Cu & \$2.03/lb Cu ⁵
Strong EBITDA⁴	LoM average \$239Mpa at \$3.20/lb (51% margin) ⁵
Significant cashflow generation	Avg cashflow \$180Mpa of 17 steady state years
Robust economics	Post-Tax 21% IRR and \$829M NPV

(1) Technical Report, entitled “NI 43-101 Technical Report: Nevada Copper Corp. Pumpkin Hollow Project, Open Pit and Underground Mine Prefeasibility Study (PFS)”, with an effective date of January 21st, 2019.

(2) 2019 PFS trade-off study including Phase 1 and Phase 2 constructed concurrently

(3) AISC is defined as C1 plus sustaining capital expenditures.

(4) Utilizes long-term copper price of \$3.20/lb.

(5) EBITDA and AISC are Non-IFRS measures. For more information please see “NI 43-101 Technical Report: Nevada Copper Corp. Pumpkin Hollow Project, Open Pit and Underground Mine Prefeasibility Study (PFS)”

Appendix A: Organic Growth 3. Open Pit Optimization - Resource Extension

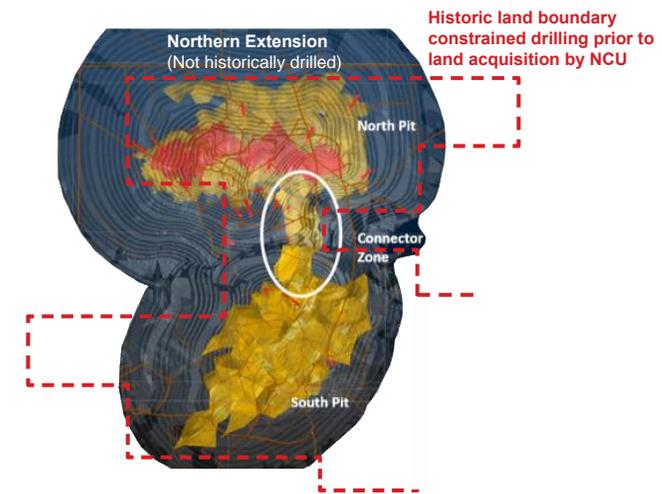

Open Pit Resource Extension

- PFS project value has notable upside from infill drilling in / on the edge of the pit
- Historic land boundary limited drilling of open pit reserve, in particular Northern Extension historically treated as waste
- 2018 drilling encountered significant mineralization both within the Northern Extension zone and beyond the pit shell
- Ultimate scale of the deposit yet to be defined

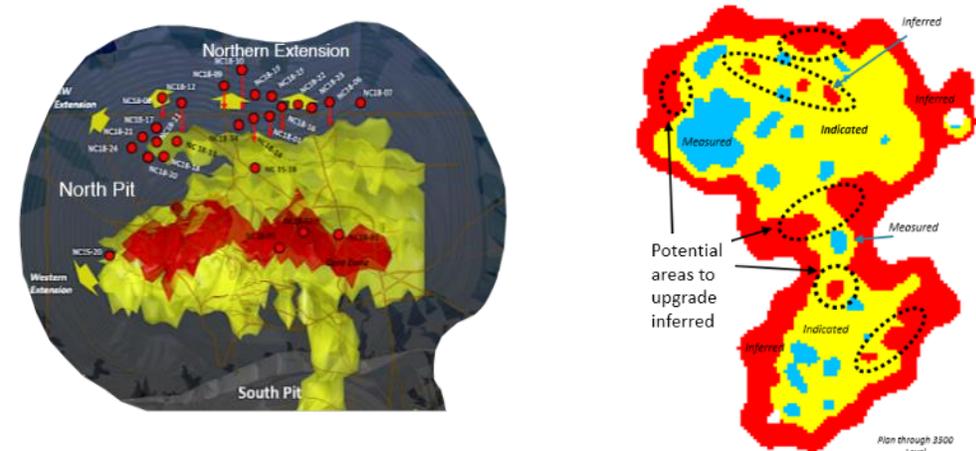

Open Pit Inferred Resource Conversion

- Infill drilling of inferred material within pit has potential to increase tonnage / grade
 - 200Mlbs Cu additional inferred within the pit and on boundary of existing mine plan
 - Conversion of inferred material could significantly increase NPV by both increasing copper revenues and reducing waste^{1,2}

Open Pit reserve was previously constrained by historic land boundary...

... 2018 drill program demonstrated Northern Extension is mineralized and ore body extends beyond pit shell

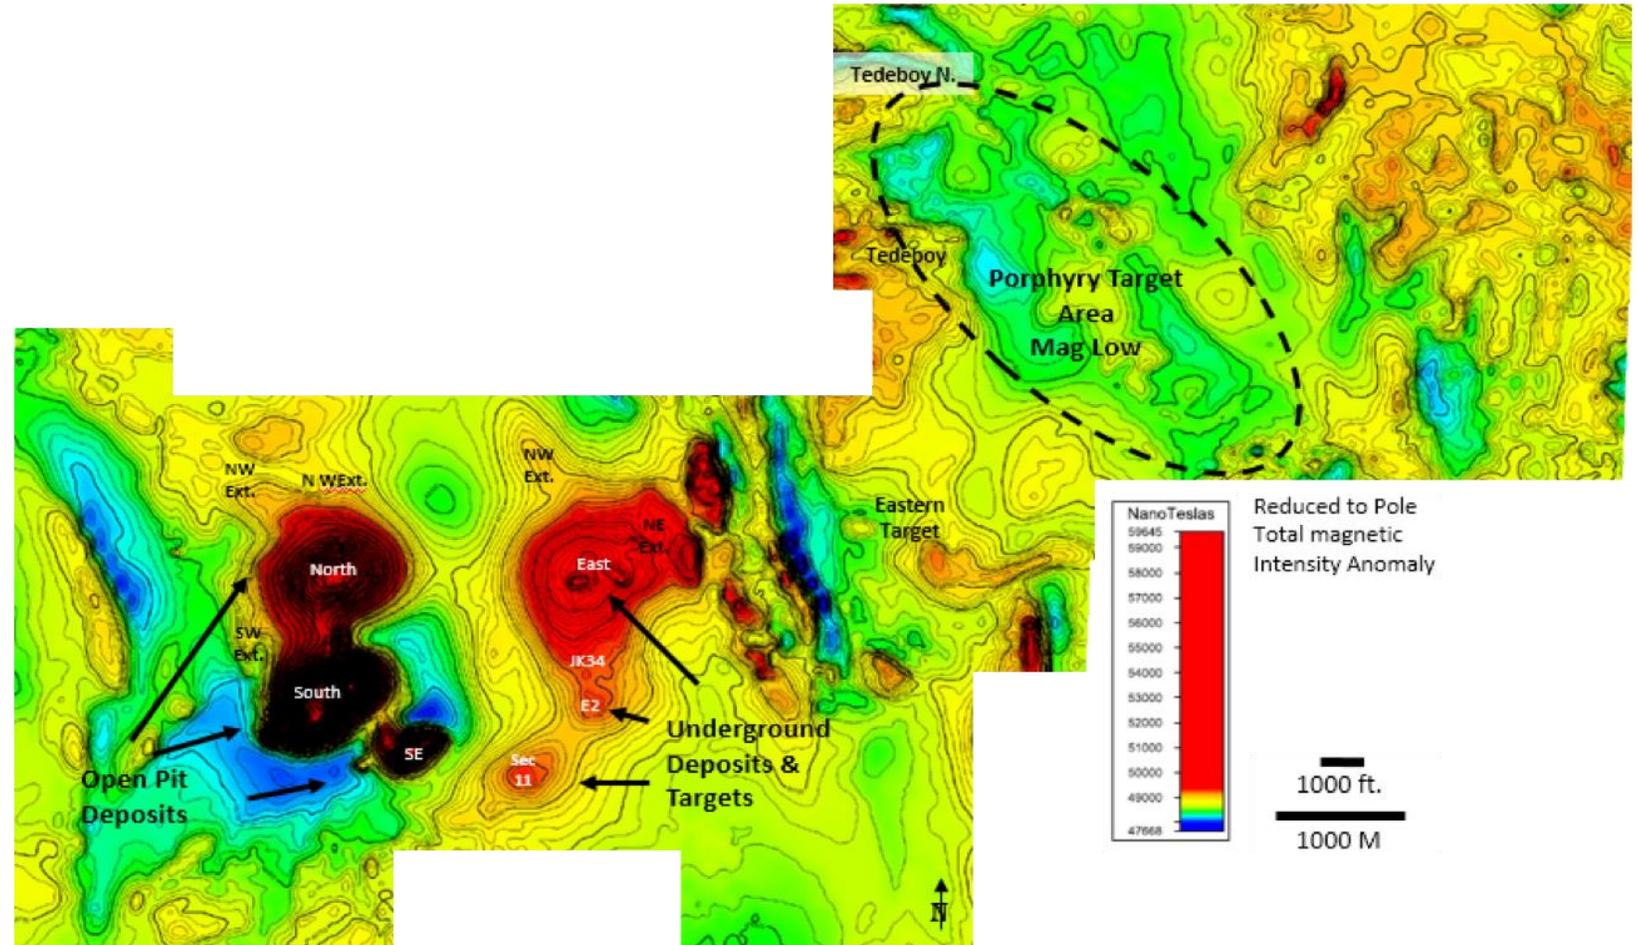

Appendix A: Organic Growth 4. Defined Exploration Targets – Near Mine IOCG

Exceptional exploration near-mine pipeline potentially offers long operational life and substantial production growth

Near Mine Exploration Potential

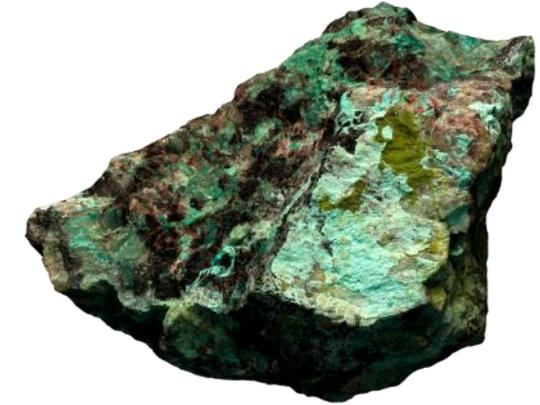

- Historic exploration was limited to Underground and Open Pit given past license limitations
- Multiple historic mine workings exist on property
- During 2019, expanded land holding by 40%, consolidating multiple new targets
- In late 2019 completed the first aero-magnetic survey since the 1960s, generating highly encouraging results and multiple new targets

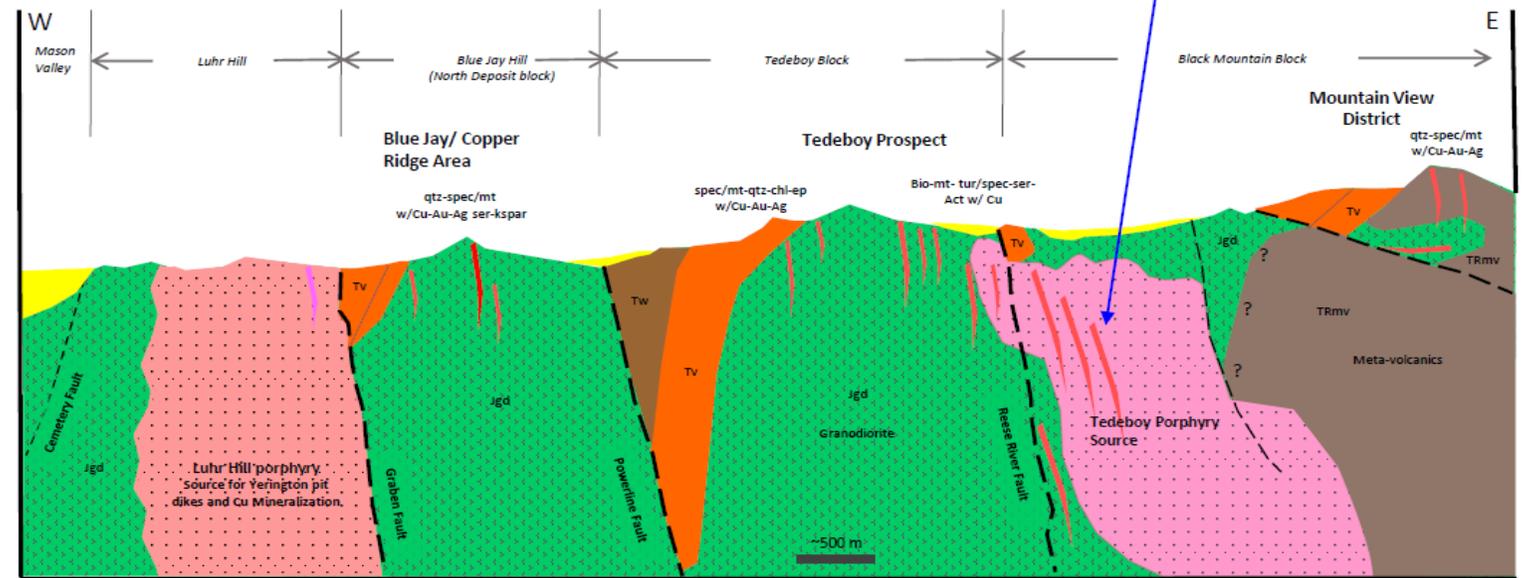

Appendix A: Organic Growth) 4. Defined Exploration Targets – Porphyry Target

Large porphyry target identified on Eastern side of property

- **Classic porphyry setting:** Alluvial covered basin to east of exposed copper mineralization, where recent geophysical survey shows a magnetic low
- **Exposed mineralization:** Higher levels of a copper porphyry indicated by exposed copper mineralization plus quartz-sericite veins cutting epidote-altered granodiorite
- **Initial copper intercepts:** Initial reconnaissance drilling and mapping/sampling has intercepted copper mineralization

East Yerington District Side Section

Looking generally Northwest

~2x vertical Exaggeration

Appendix A: Organic Growth) 4. Strategic Advantage in Re-Emerging Cu District

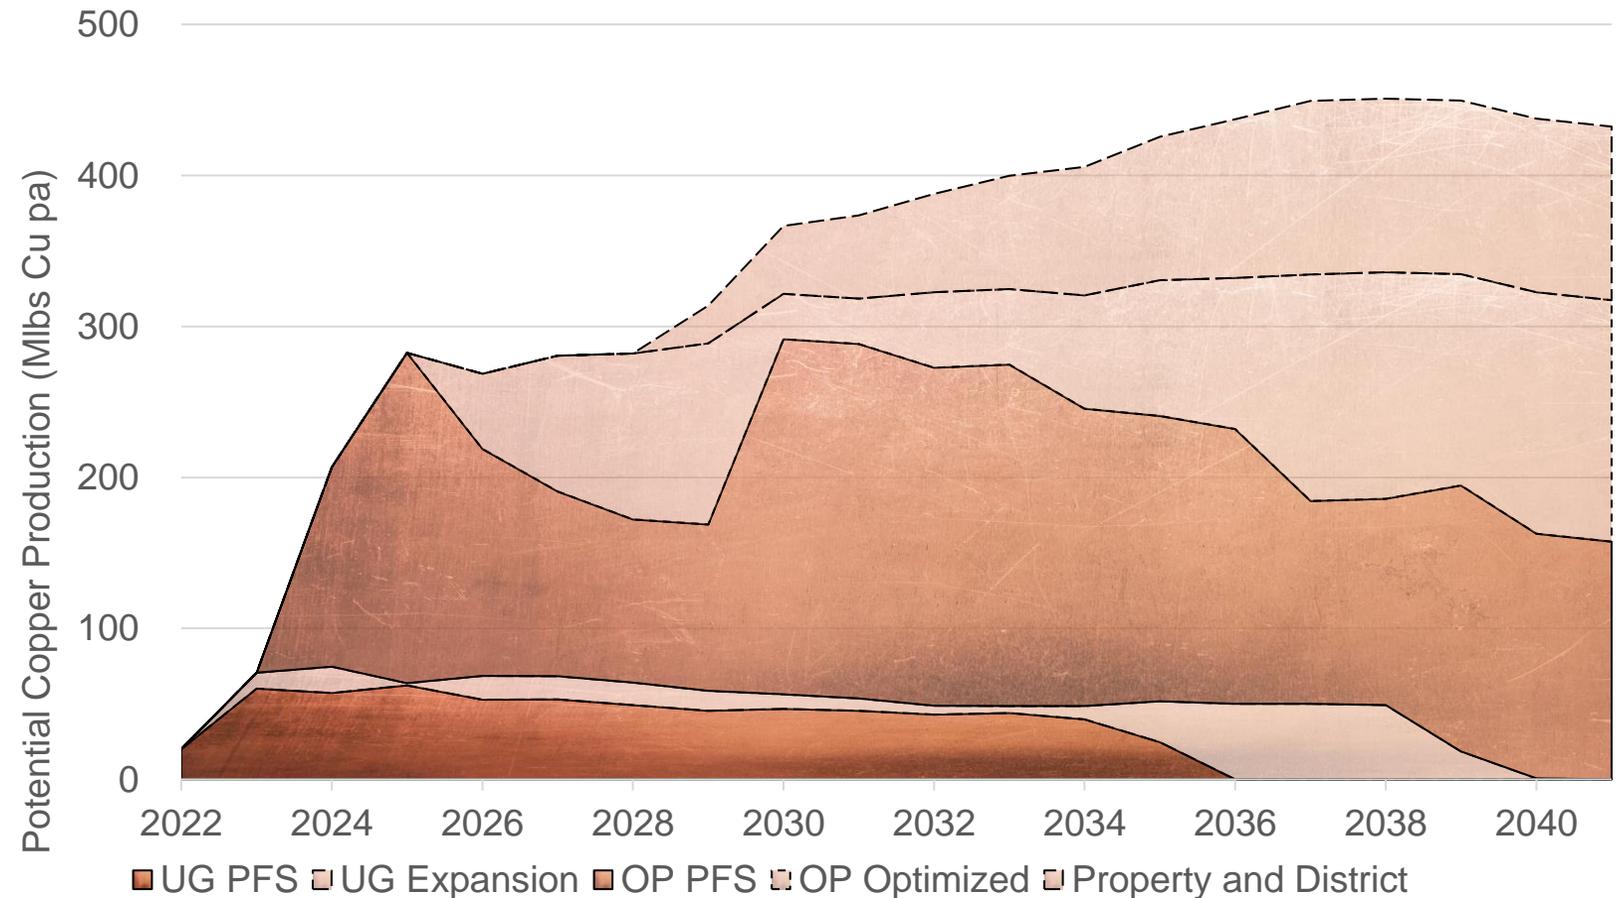

- Significant defined copper resources in district across multiple deposits
- Nevada Copper holds permits and key infrastructure within the district
- Nevada Copper's processing capability and infrastructure is key to creating a regional copper hub, unlocking viability of other Yerington deposits
- Region logically operated as a district over multiple generations

Appendix A: Strategic Plan

Build a new copper district through staged expansion options^{1,2}

- 1) Underground mine ramping-up and expandable
- 2) Open Pit to be next project, fully-permitted and highly scalable
- 3) Near-mine targets defined to extend operating life
- 4) Potentially large porphyry target identified
- 5) Strategic advantage in re-emerging copper district with large copper endowment

Appendix B: Board of Directors

Board of directors with exceptional depth of industry experience

Stephen Gill

Chairman

Stephen is a Managing Partner at Pala Investments Ltd. He has overseen many of Pala's principal investments in the mining sector and specializes in assisting companies to define and implement strategic initiatives to realize value.

Tom Albanese

Lead Independent Director
Technical Committee Chair

Tom is currently a Director of Franco-Nevada Corporation, and previously held roles as CEO of Vedanta Resources (2014-2017) and Rio Tinto plc (2007-2013). He also served on the boards of Ivanhoe Mines Ltd and Palabora Mining.

Ernie Nutter

Director
Compensation Committee
Chair

Ernie is a highly regarded mining analyst, formerly with one of the world's largest money managers, Capital Group, from 2004 until his retirement in 2017. Prior to this he was Managing Director of RBC Capital Markets.

Lucio Genovese

Director
Audit Committee Chair
Governance Committee Chair

Lucio has 28 years of experience in both the merchant and financial sector of the metals and mining Industry. He is currently CEO of Nage Capital Management in Baar, Switzerland, and a member of the board of Mantos Copper S.A.

Mike Brown

Director

Mike is Managing Partner Africa at Palaris, a leading international mining advisory firm. Prior to this, he was Managing Director Technical at Pala Investments and COO of De Beers Consolidated Mines, responsible for all operations in South Africa.

Kate Southwell

Director

Kate has over 15 years of experience as a legal advisor, including as General Counsel of Nevada Copper from 2017-2019. She is a currently General Counsel at Pala Investments, and previously worked at Nyrstar and Shearman & Sterling LLP.

Evgenij Iorich

Director

Evgenij has over 15 years of investment and asset management experience and is currently Managing Partner at Pala Investments where he is involved in oversight of Pala's private equity and liquid equity investment portfolios.

Appendix C: Product Marketing and Key Balance Sheet Items

Flexible concentrate treatment options

- Open pit unencumbered
- **Clean concentrate**, a desirable feed for many smelters:
 - High Cu
 - Low As and Hg
 - Very good ratio of S, Fe, Cu
- **Proximity to West Coast ports and regional smelters** presents attractive outlets for concentrate in NA and Asia
 - Impurity levels well below international import and shipping limits
 - 279 miles railway route from transload facility to port of Stockton, with new transload facility 20 miles from mine gate
- **Well positioned to supply local smelters** that regularly process domestic concentrate to maximize utilization rates

Key Balance Sheet Items¹

- **Cash:** \$68m
- **Senior debt: KfW:**
 - **Tranche 1:** \$115m, 10yrs, L+2.1%, first repayment July 2025
 - **Tranche 2:** \$15m 3yrs, L+5.4%, first repayment July 2024
- **Working Capital Facility:** Concord Resources - \$40m available, 5yrs, L+5% (\$27m drawn at 30 Sep 2021)
- **Amended Credit Facility:** Pala Investments - \$35m, L+9%, no repayment until 2026
- **Precious metal by-product stream:** Triple Flag - \$85m, 97.5% of precious metals from UG mine

KfW IPEX-Bank is a large, sought-after partner focused on the export industry, climate protection and infrastructure and supply of raw materials.

"Financing of this type allows KfW IPEX-Bank to play an important role in environmental and climate protection, while helping ensure the future success of German and European industry."

Markus Scheer, member of the Management Board of KfW IPEX-Bank

Appendix D: Resources and Reserves

Mineral Reserve Estimate (Underground)

Category	Tons	Cu	Au	Ag
	(millions)	%	oz/st	oz/st
Proven	7.4	1.85	0.007	0.144
Probable	16.5	1.47	0.006	0.138
Net Reserves	23.9	1.59	0.006	0.139

Note: Effective date on the Underground Mineral Reserve is September 15, 2017

Open Pit Mineral Reserves

The current mineral reserve estimate for the open pit was disclosed April 16, 2019 and the related NI 43-101 Technical Report was filed on SEDAR in April 16, 2019, with an effective date of January 21, 2019.

The tons, grades, and classification of the Mineral Reserves estimate in the Open Pit PFS mine plan are tabled below.

Confidence Category	Ore (Mst)	Average Ore Grades			Contained Metal		
		Cu (%)	Au (oz/st)	Ag (oz/st)	Cu (Mlbs)	Au (Koz)	Ag (Koz)
Proven Mineral Reserves (North)	75.4	0.65	0.002	0.070	983	151	5,302
Proven Mineral Reserves (South)	31.3	0.36	0.002	0.045	223	48	1,420
Proven Mineral Reserves (North + South)	106.6	0.57	0.002	0.063	1,206	199	6,722
Probable Mineral Reserves (North)	147.4	0.48	0.001	0.055	1,407	215	8,086
Probable Mineral Reserves (South)	131.7	0.37	0.002	0.049	977	203	6,458
Probable Mineral Reserves (North + South)	279.1	0.43	0.001	0.052	2,384	419	14,544
Proven and Probable Mineral Reserves	385.7	0.47	0.002	0.055	3,590	617	21,266

Note: Effective date of Open Pit Mineral Reserve is January 21, 2019.

Mineral Resource Underground Eastern Area

Category	Cutoff Grade %/Cu	Tons (millions)	Grade %/Cu	Contained Cu lb (millions)	Grade Au oz/st	Contained Au ozs (thousands)	Grade Ag oz/st	Contained Ag ozs (thousands)
Measured	0.75	12.1	1.60	389	0.006	74	0.127	1,541
Indicated	0.75	41.9	1.33	1,114	0.005	217	0.112	4,716
Measured + Indicated	0.75	54.1	1.39	1,503	0.005	291	0.116	6,257
Inferred	0.75	29.2	1.09	636	0.003	87	0.064	1,875

Notes: Includes East and E2 deposits

Effective date on Underground Mineral Resource is April 15, 2015

Open Pit Mineral Resources

The current mineral resource estimate for the open pit was disclosed April 16, 2019 and the related NI 43-101 Technical Report was filed on SEDAR in April 16, 2019, with an effective date of January 21, 2019.

Confidence Category	Ore (Mst)	Average Ore Grades			Contained Metal		
		Cu (%)	Au (oz/st)	Ag (oz/st)	Cu (Mlbs)	Au (Koz)	Ag (Koz)
Measured Mineral Resources	134	0.561	0.002	0.064	1,508	255	8,593
Indicated Mineral Resources	419	0.417	0.001	0.051	3,492	623	21,185
Measured and Indicated Mineral Resources	553	0.452	0.002	0.054	5,000	879	29,778

Note: Effective date of Open Pit Mineral Resource is January 21, 2019.

Confidence Category	Ore (Mst)	Average Ore Grades			Contained Metal		
		Cu (%)	Au (oz/st)	Ag (oz/st)	Cu (Mlbs)	Au (Koz)	Ag (Koz)
Inferred Mineral Resources	28	0.358	0.001	0.040	197	37	1,088
